RAINFALL CHART
BY
NEGRETTI AND ZAMBRA,
METEOROLOGICAL INSTRUMENT MAKERS TO HER MAJESTY,
HOLBORN VIADUCT, E.C.; 45, CORNHILL, E.C.; 122, REGENT STREET, W.; & CRYSTAL PALACE, S.E.

Kept by Servant of F. N. Budd

At Batworthy, Gidleigh, Devon

Time 9 A.M.

Date 1892

DIRECTIONS.

Top of gauge 12 inches above the ground in open space. Readings to be taken in the morning and recorded for previous day. Melted snow equals one-twelfth its average depth—thus, 12 inches snow=1·0 rain

REGISTER OF RAINFALL IN 1899.

Kept at *Mamhead Rectory,*
in the County of *Devon,*
by *the Revd. W. C. Plenderleath.*

RAIN GAUGE.
Lat. 50° 37′ Lon. 3° 31′ W.
Time of Observation 9.30 am.
Diameter 5 in.
Height of top above Ground 1 ft.
" " Sea Level 467 ft.

NOTE.—Full instructions respecting the measurement of rain are given in "*Arrangements respecting the Systematic Observation and Record of the Rainfall of the British Isles,*" which is sent post-free on application to Mr. G. J. SYMONS, 62, Camden Square, London, N.W.

Between Feb. 13 and Mar. 29. the ordinary observer was away, & his remplaçant appears to have entered the R.T. on the day of taking & not on that of falling. The observer has good reason to believe that the amounts entered are perfectly correct, if only the dates be corrected.

EDWARD STANFORD, COCKSPUR STREET, CHARING CROSS.

PRICE 3D.

January 4th very severe frost & cold wind
April very hot & fine until the 11th
Latter part chilly and rainy
Last week of June & first week of
July very hot & fine. then damp
ungenial weather until towards
the end of August.
The first half of October very fine
& beautiful
The last 12 days very wet.
$\overset{\text{in}}{5}$·45 in 12 consecutive days –
November 6th a perfect, brilliant
clear warm day.
7th torrents of rain again
Ditto daily till Novr 15th Hail storms
16th Brilliant day, one shower about 2·30 p.m
Decr a mild month on the whole
Some very beautiful sunny days –
Fuchsias untouched by frost till 31st
Towards the end some heavy gales –
The last three days a high cold wind
blowing, some hail storms & a
slight fall of snow on the night
of the 31st with sharp frost.

REGISTER OF RAINFALL IN 1894

Kept at St Peter Street Tiverton Devon by Miss Gill

Latitude ....

Time of Observation 9 a.m.

Longitude ....

Height of Receiver of Rain Gauge. { Above Ground 6 ft / Above Sea Level 270 ft.

Condensed Instructions.—Fix the gauge firmly, with its orifice level and 1 ft. above the ground, quite clear of trees and walls, empty it daily at 9 a.m., and enter it against the preceding day. Snow should be melted slowly in a closed vessel and the amount entered as rain, an "S" being prefixed. With a low temperate and high wind, it is sometimes blown out of the funnel; then take one-twelfth of the average depth of snow and enter that as the yield of water—*e.g.*, 3 inches snow = ·25 of rain. When there is no rain, a line should be drawn, rather than cyphers inserted.

Observers will oblige by sending duplicates of this Register, or even the monthly totals, to Mr. G. J. Symons, of 62, Camden Square, London, N.W., for insertion in his annual tables of *British Rainfall*, which now contain returns from more than 1500 stations.

Additional copies of this form (price 3d. each) can be obtained of the above, from Mr. Stanford, *6 & 7, Charing Cross, and from all the leading opticians.*
